

## Python assignment

1. Add two numbers

```
num_1 = 10  
num_2 = 20  
a= num_1+num_2  
Print(a)
```

2. Try to add integer and string

```
num_1 = 10  
num_2 = '10'  
a= num_1+num_2  
Print(a)
```

It will bring the type error and syntax error

Alternate method

```
num_1 = 10  
num_2 =int('10')  
a=num_1+num_2  
Print(a)
```

3. formatting string

```
name='prasanna'  
print(f"the given name is {name}")
```

[4.how](#) to add space and next line in print

```
Print ( 'hello upgrade I want to learn \n\t python')
```
